DEATHS OF EUROPE INHABITANTS BY ALL DETAILED CAUSES FROM 2011 - 2021

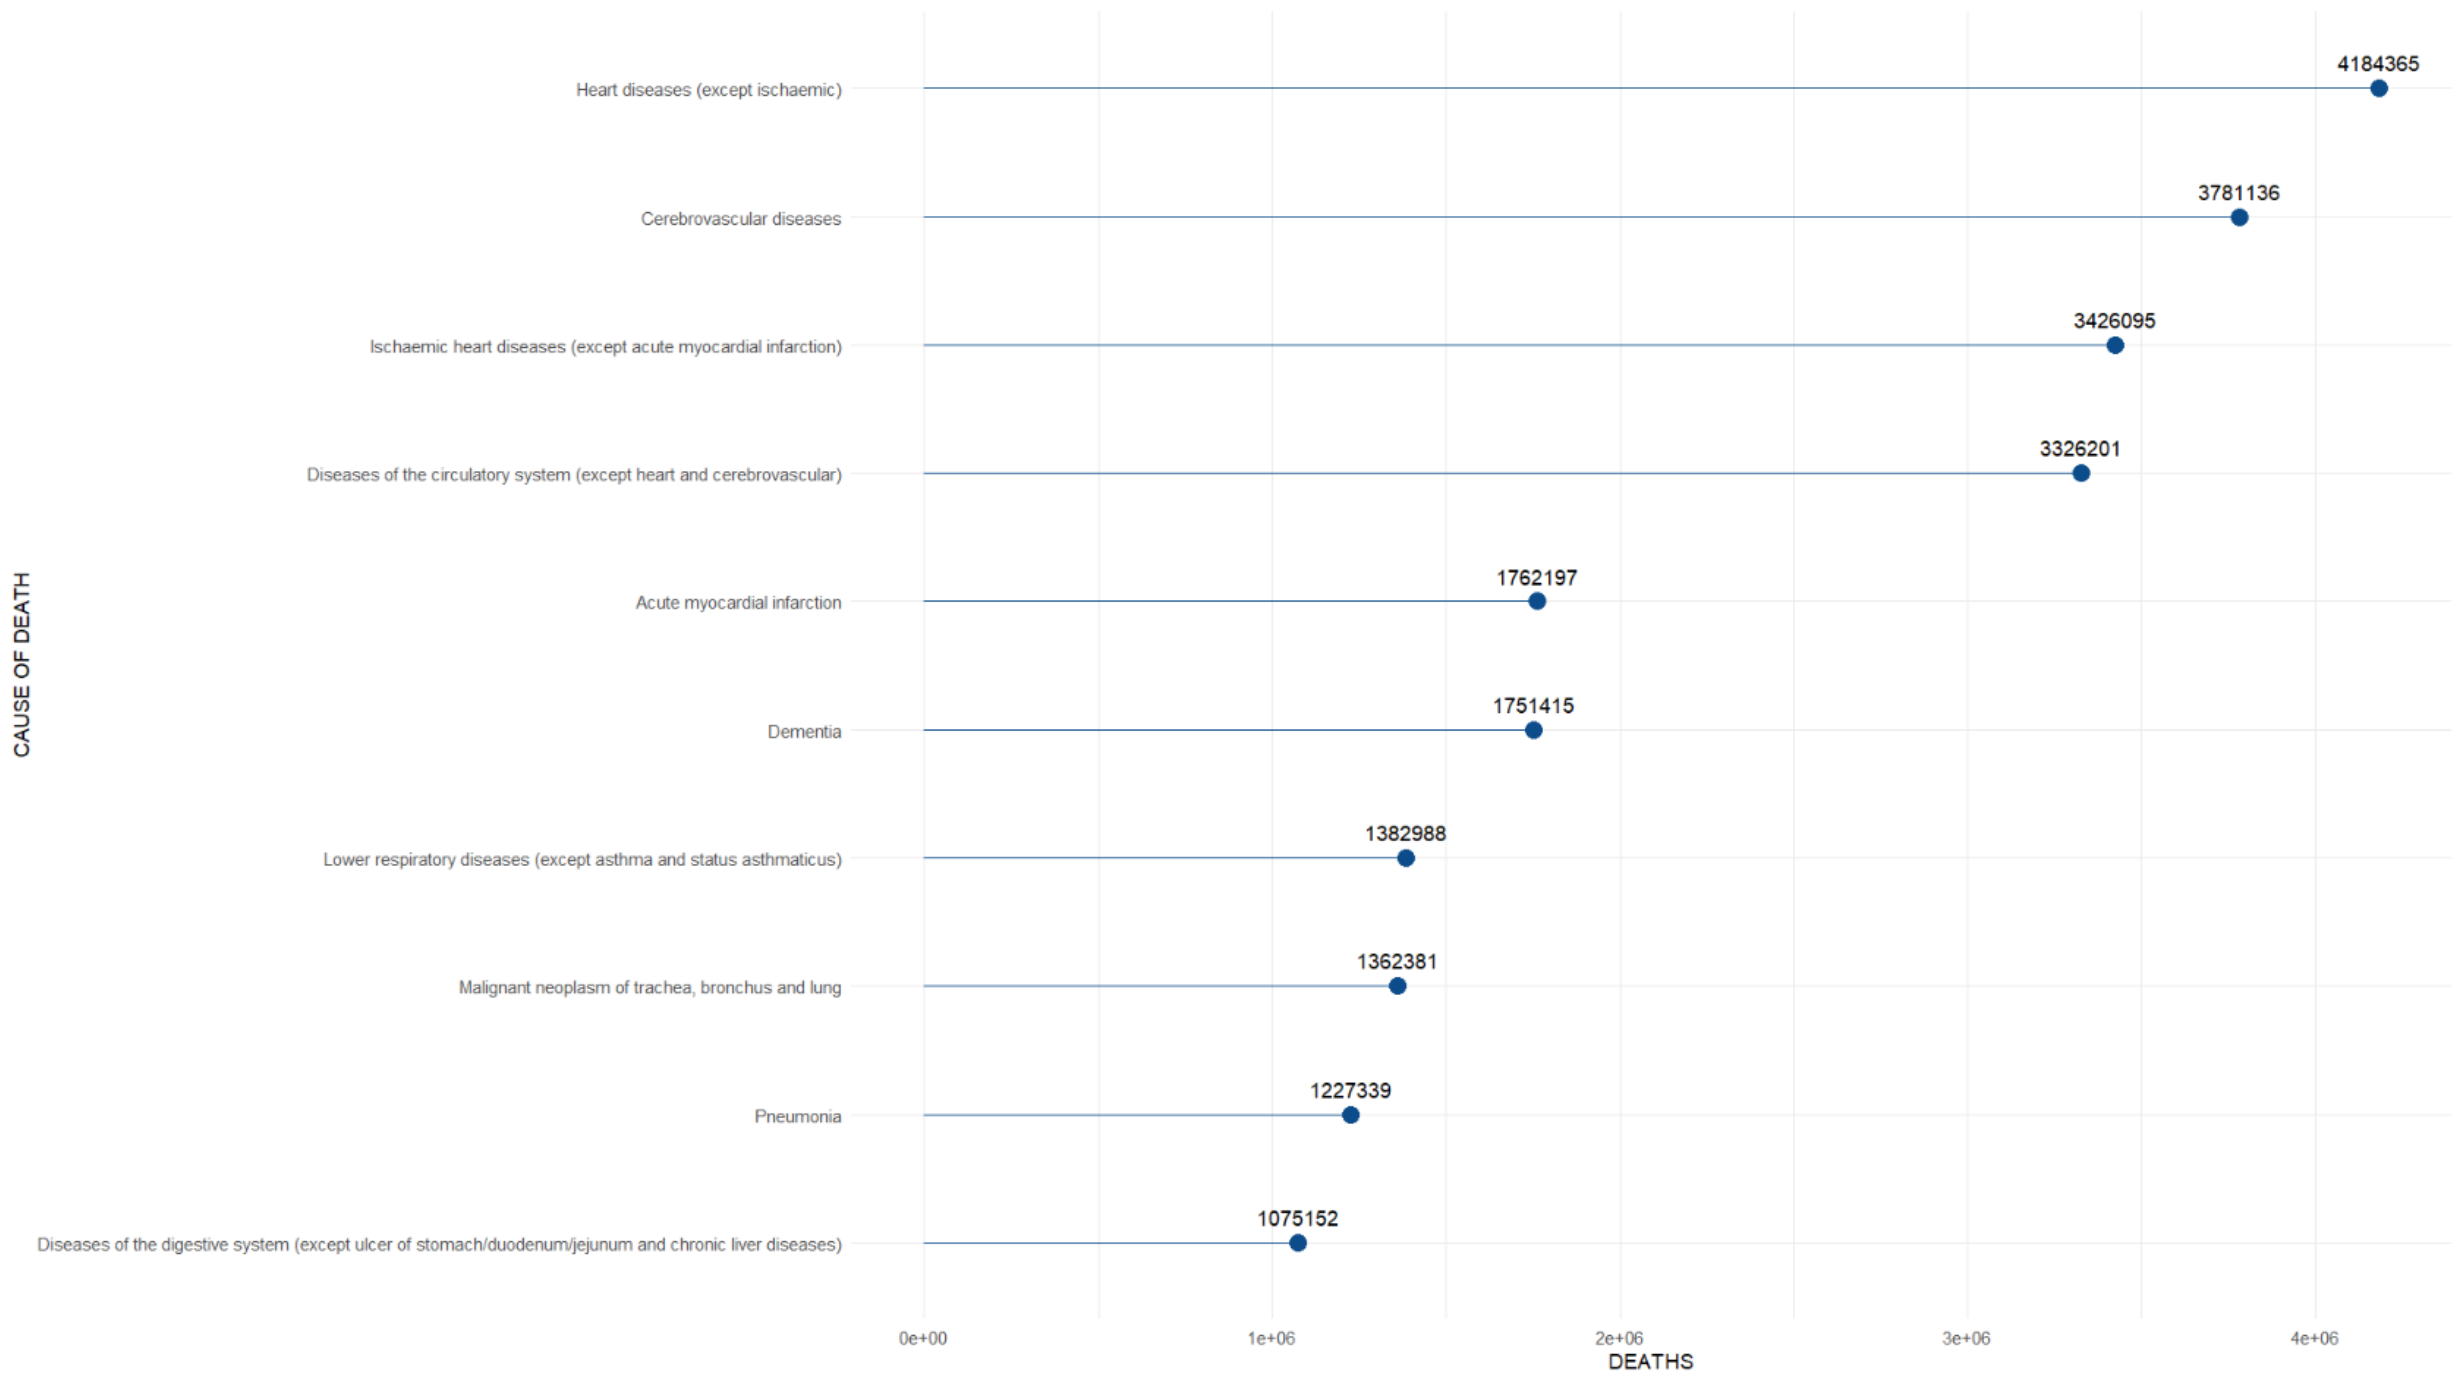

Figure 3 - Dementia is the 6th highest cause of death across Europe inhabitants

DEMENTIA DEATHS PER 100,000 INHABITANTS OF EUROPE AND GREECE BY YEAR

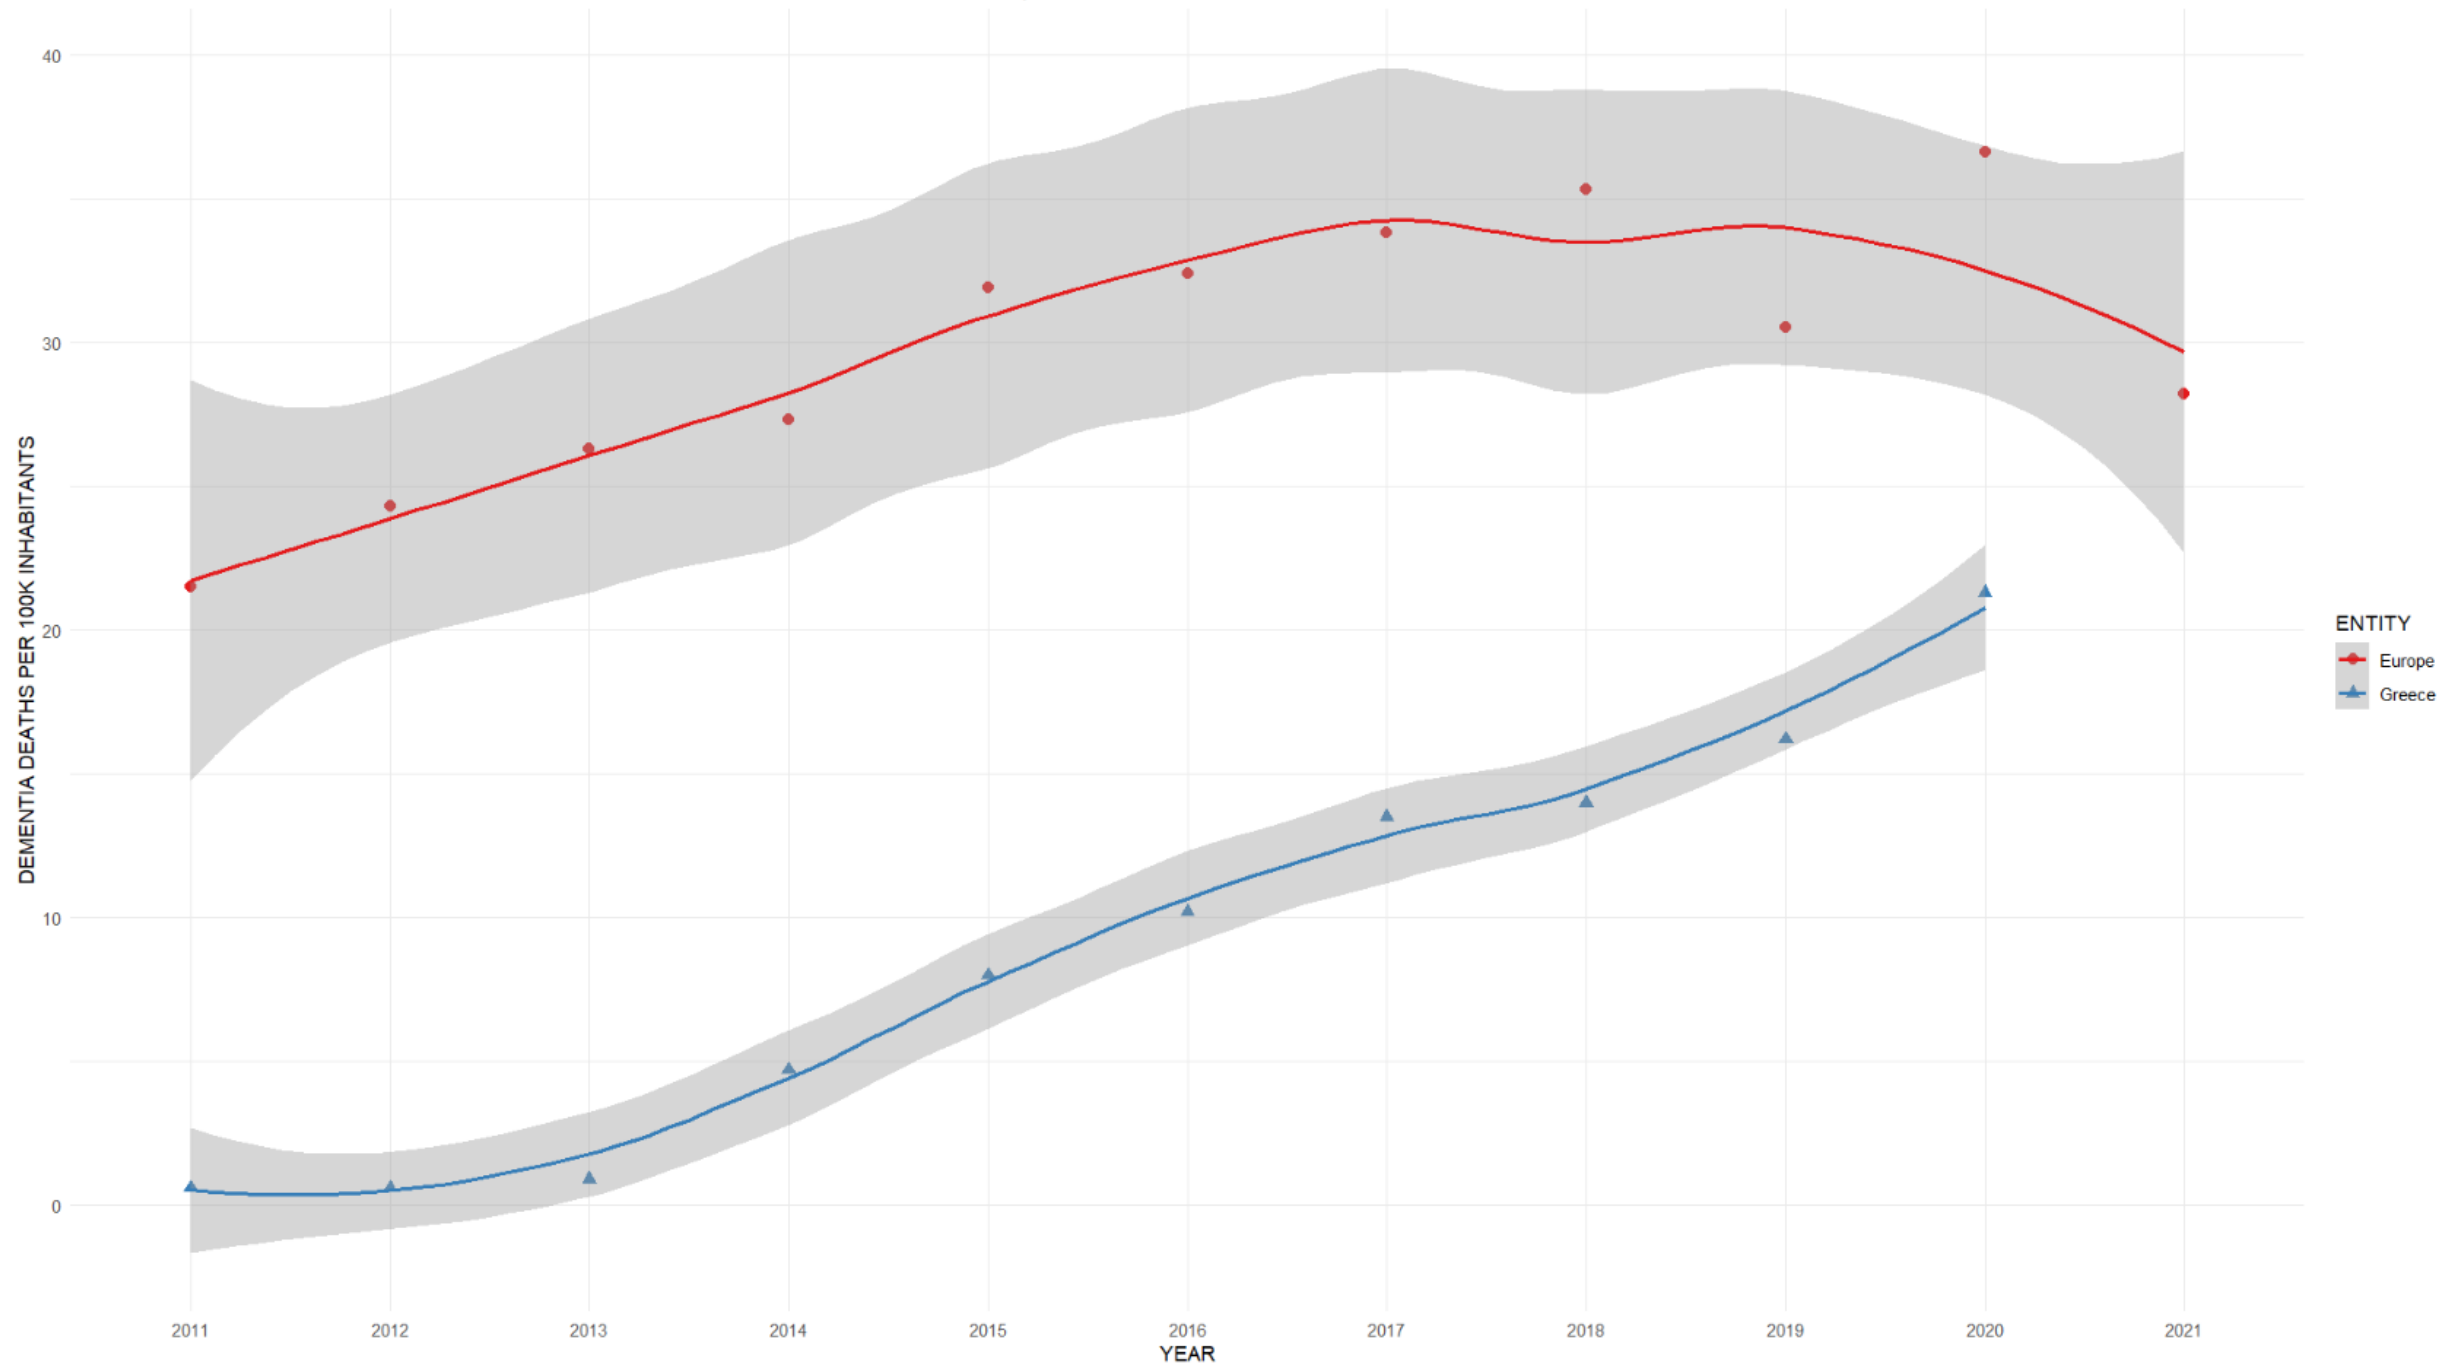

Figure 4 - Greece has a lower rate of dementia deaths, however there exists an increasing trend over the years contrary to Europe's average which seems to have a decreasing trend from 2019 onwards and Greece seems to most probably exceed Europe's average by 2022

AVERAGE DEMENTIA DEATHS PER 100,000 INHABITANTS OVER THE PERIOD 2011 - 2021 BY EUROPEAN COUNTRY

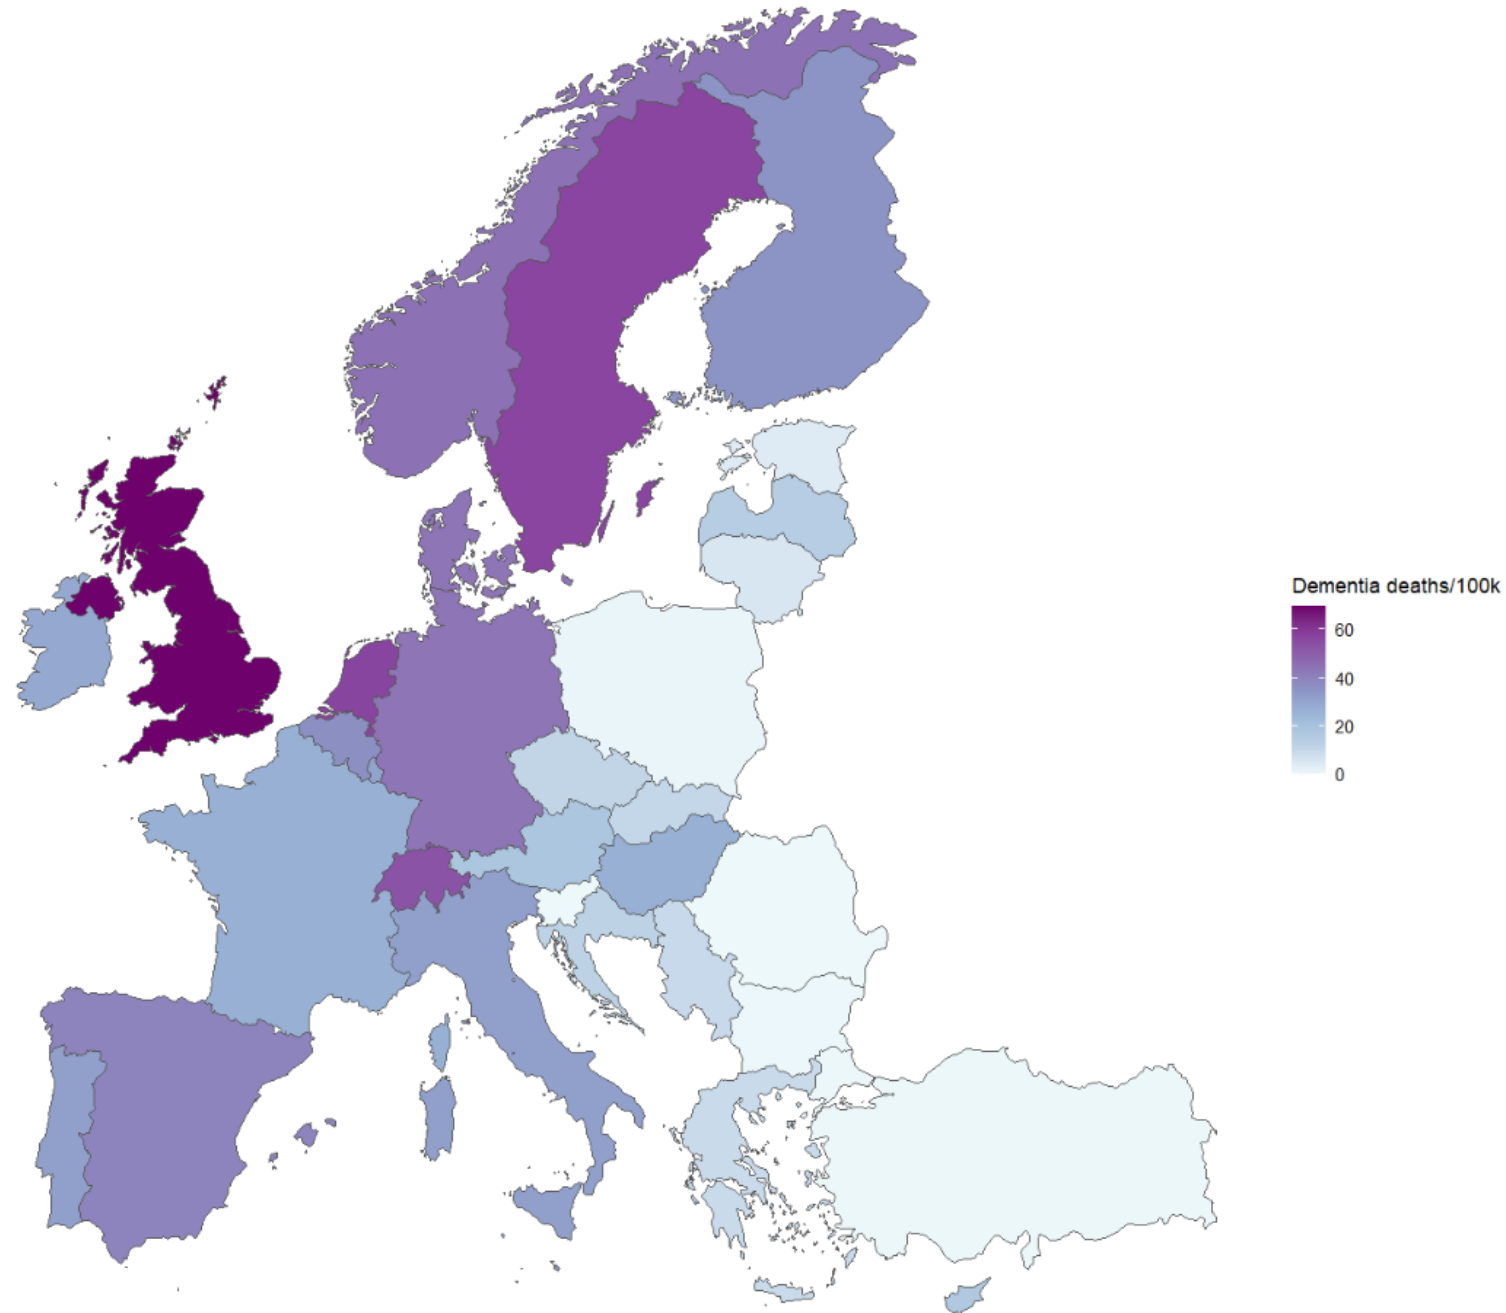

Figure 5 - Europe's average dementia deaths per 100k inhabitants in a year map

DEMENTIA DEATHS PER 100,000 INHABITANTS BY EUROPEAN COUNTRY AND YEAR IN A PLOT

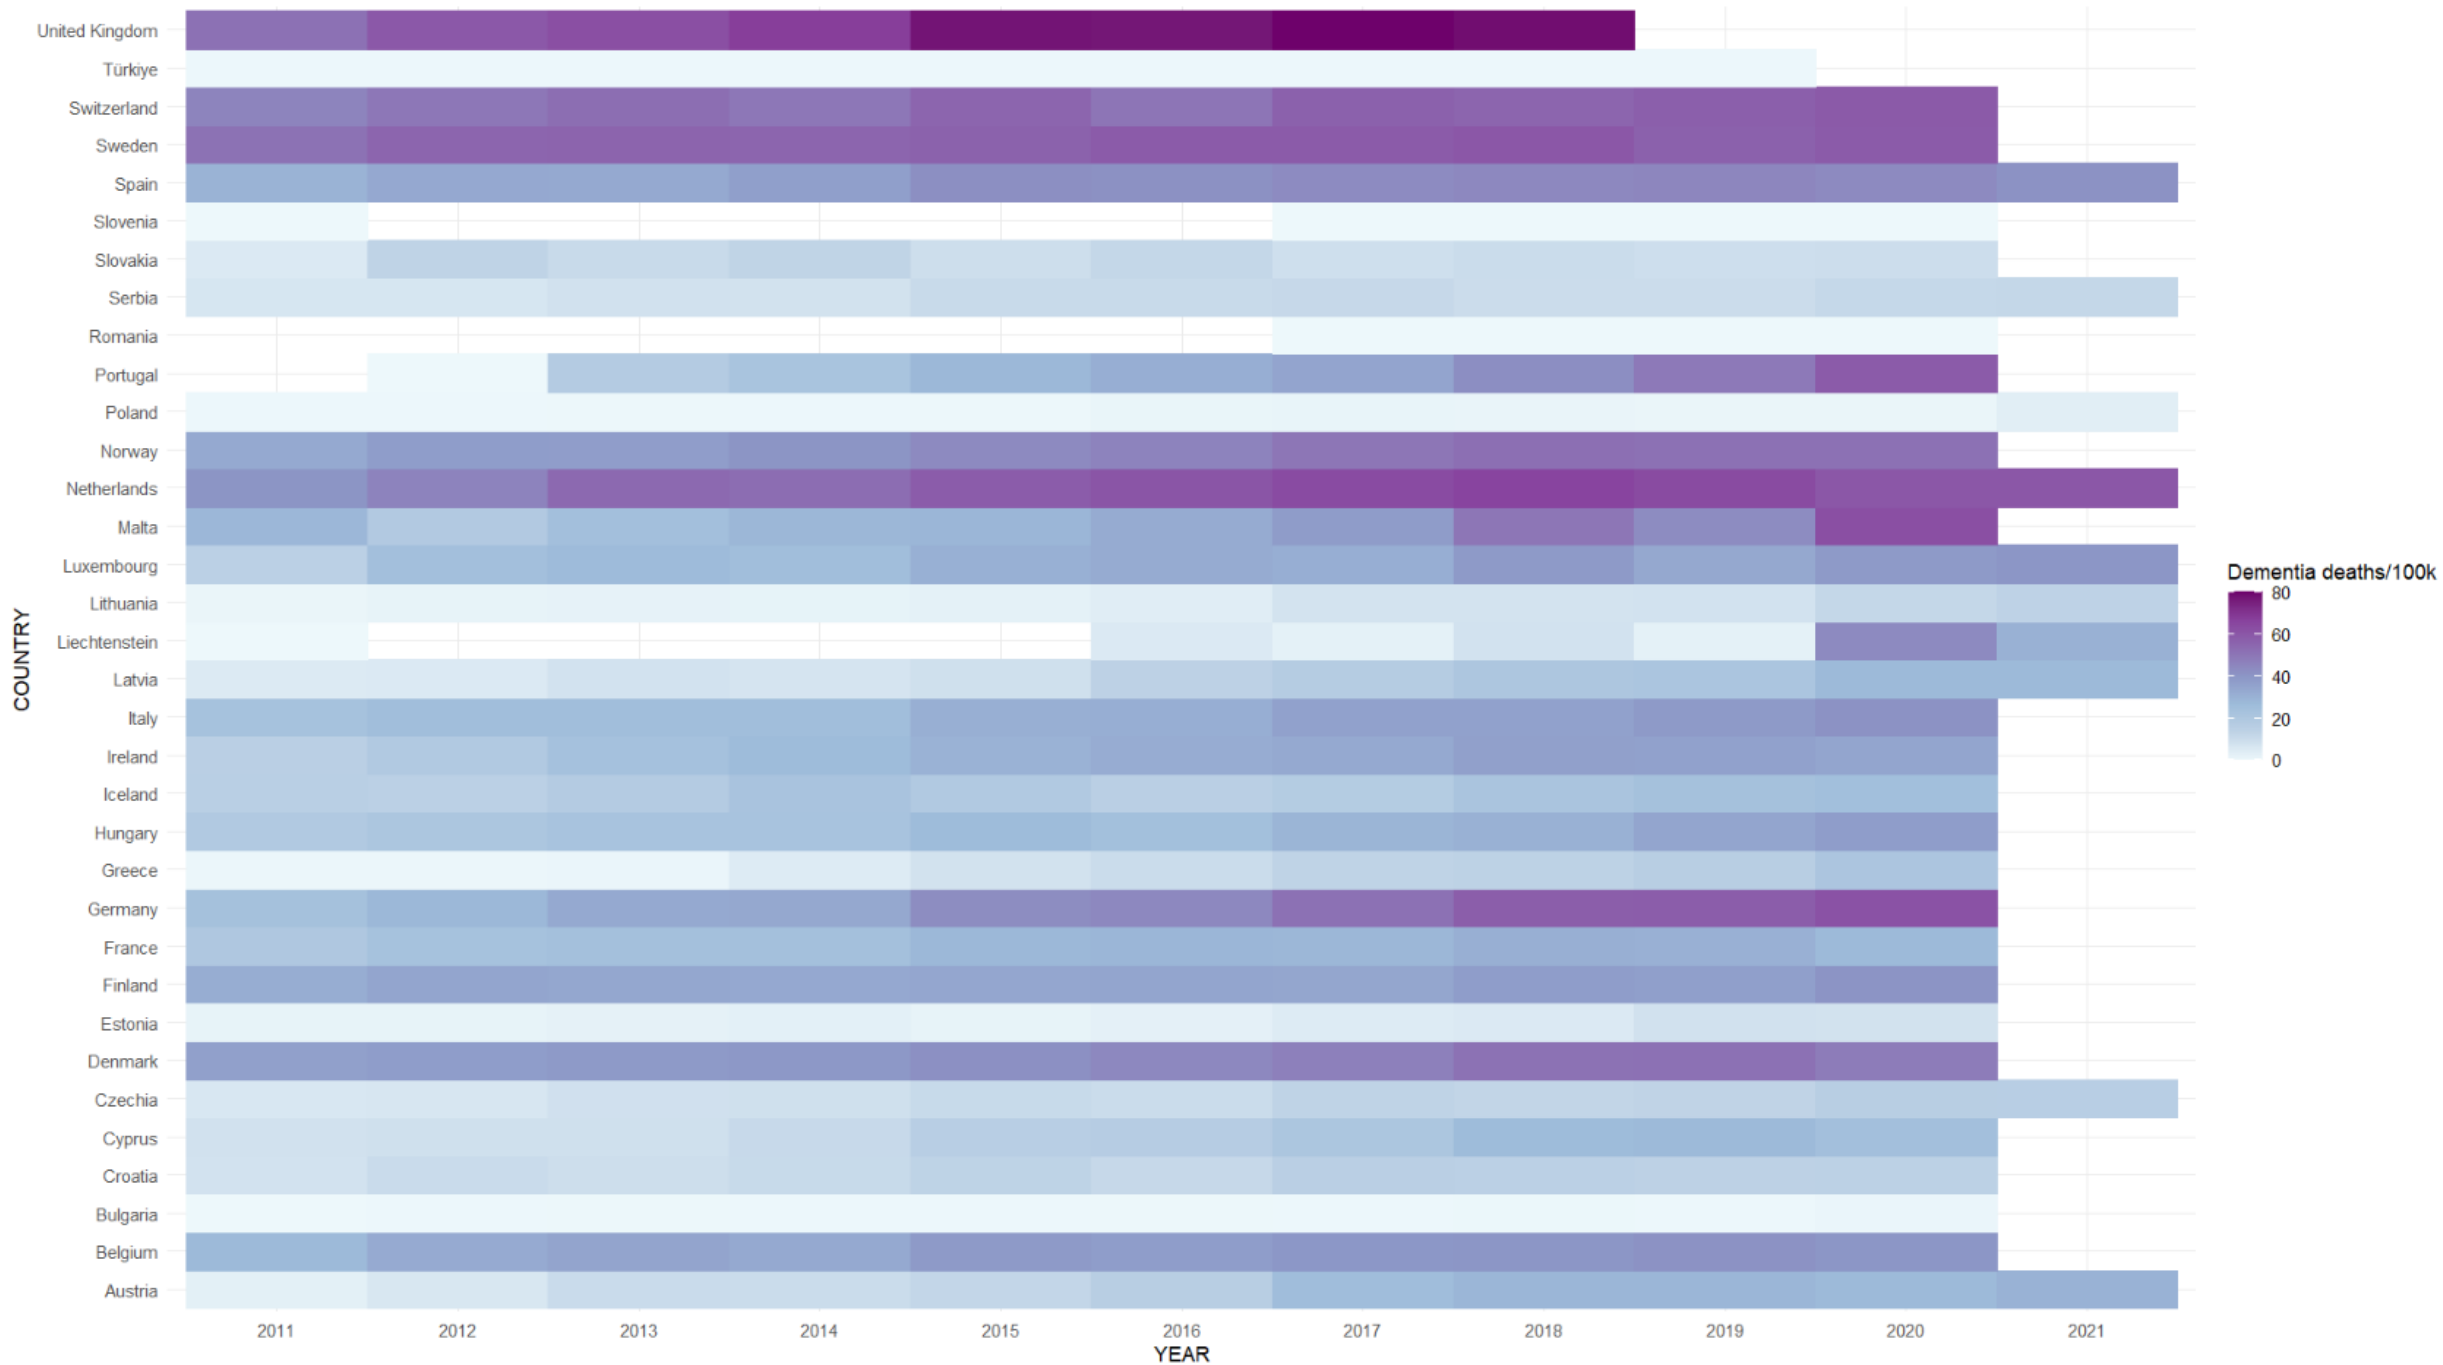

Figure 6 - Europe's average dementia deaths per 100k inhabitants started decreasing from 2019 (as shown in Figure 5) mainly due to the Feb 2020 BREXIT, because UK had by far the biggest ratio of dementia deaths and obviously did not send any data to Eurostat from the previous year (2019) and onwards

DEMENTIA DEATHS PER 100,000 INHABITANTS BY YEAR FOR EACH EUROPEAN COUNTRY IN SEPARATE PLOTS

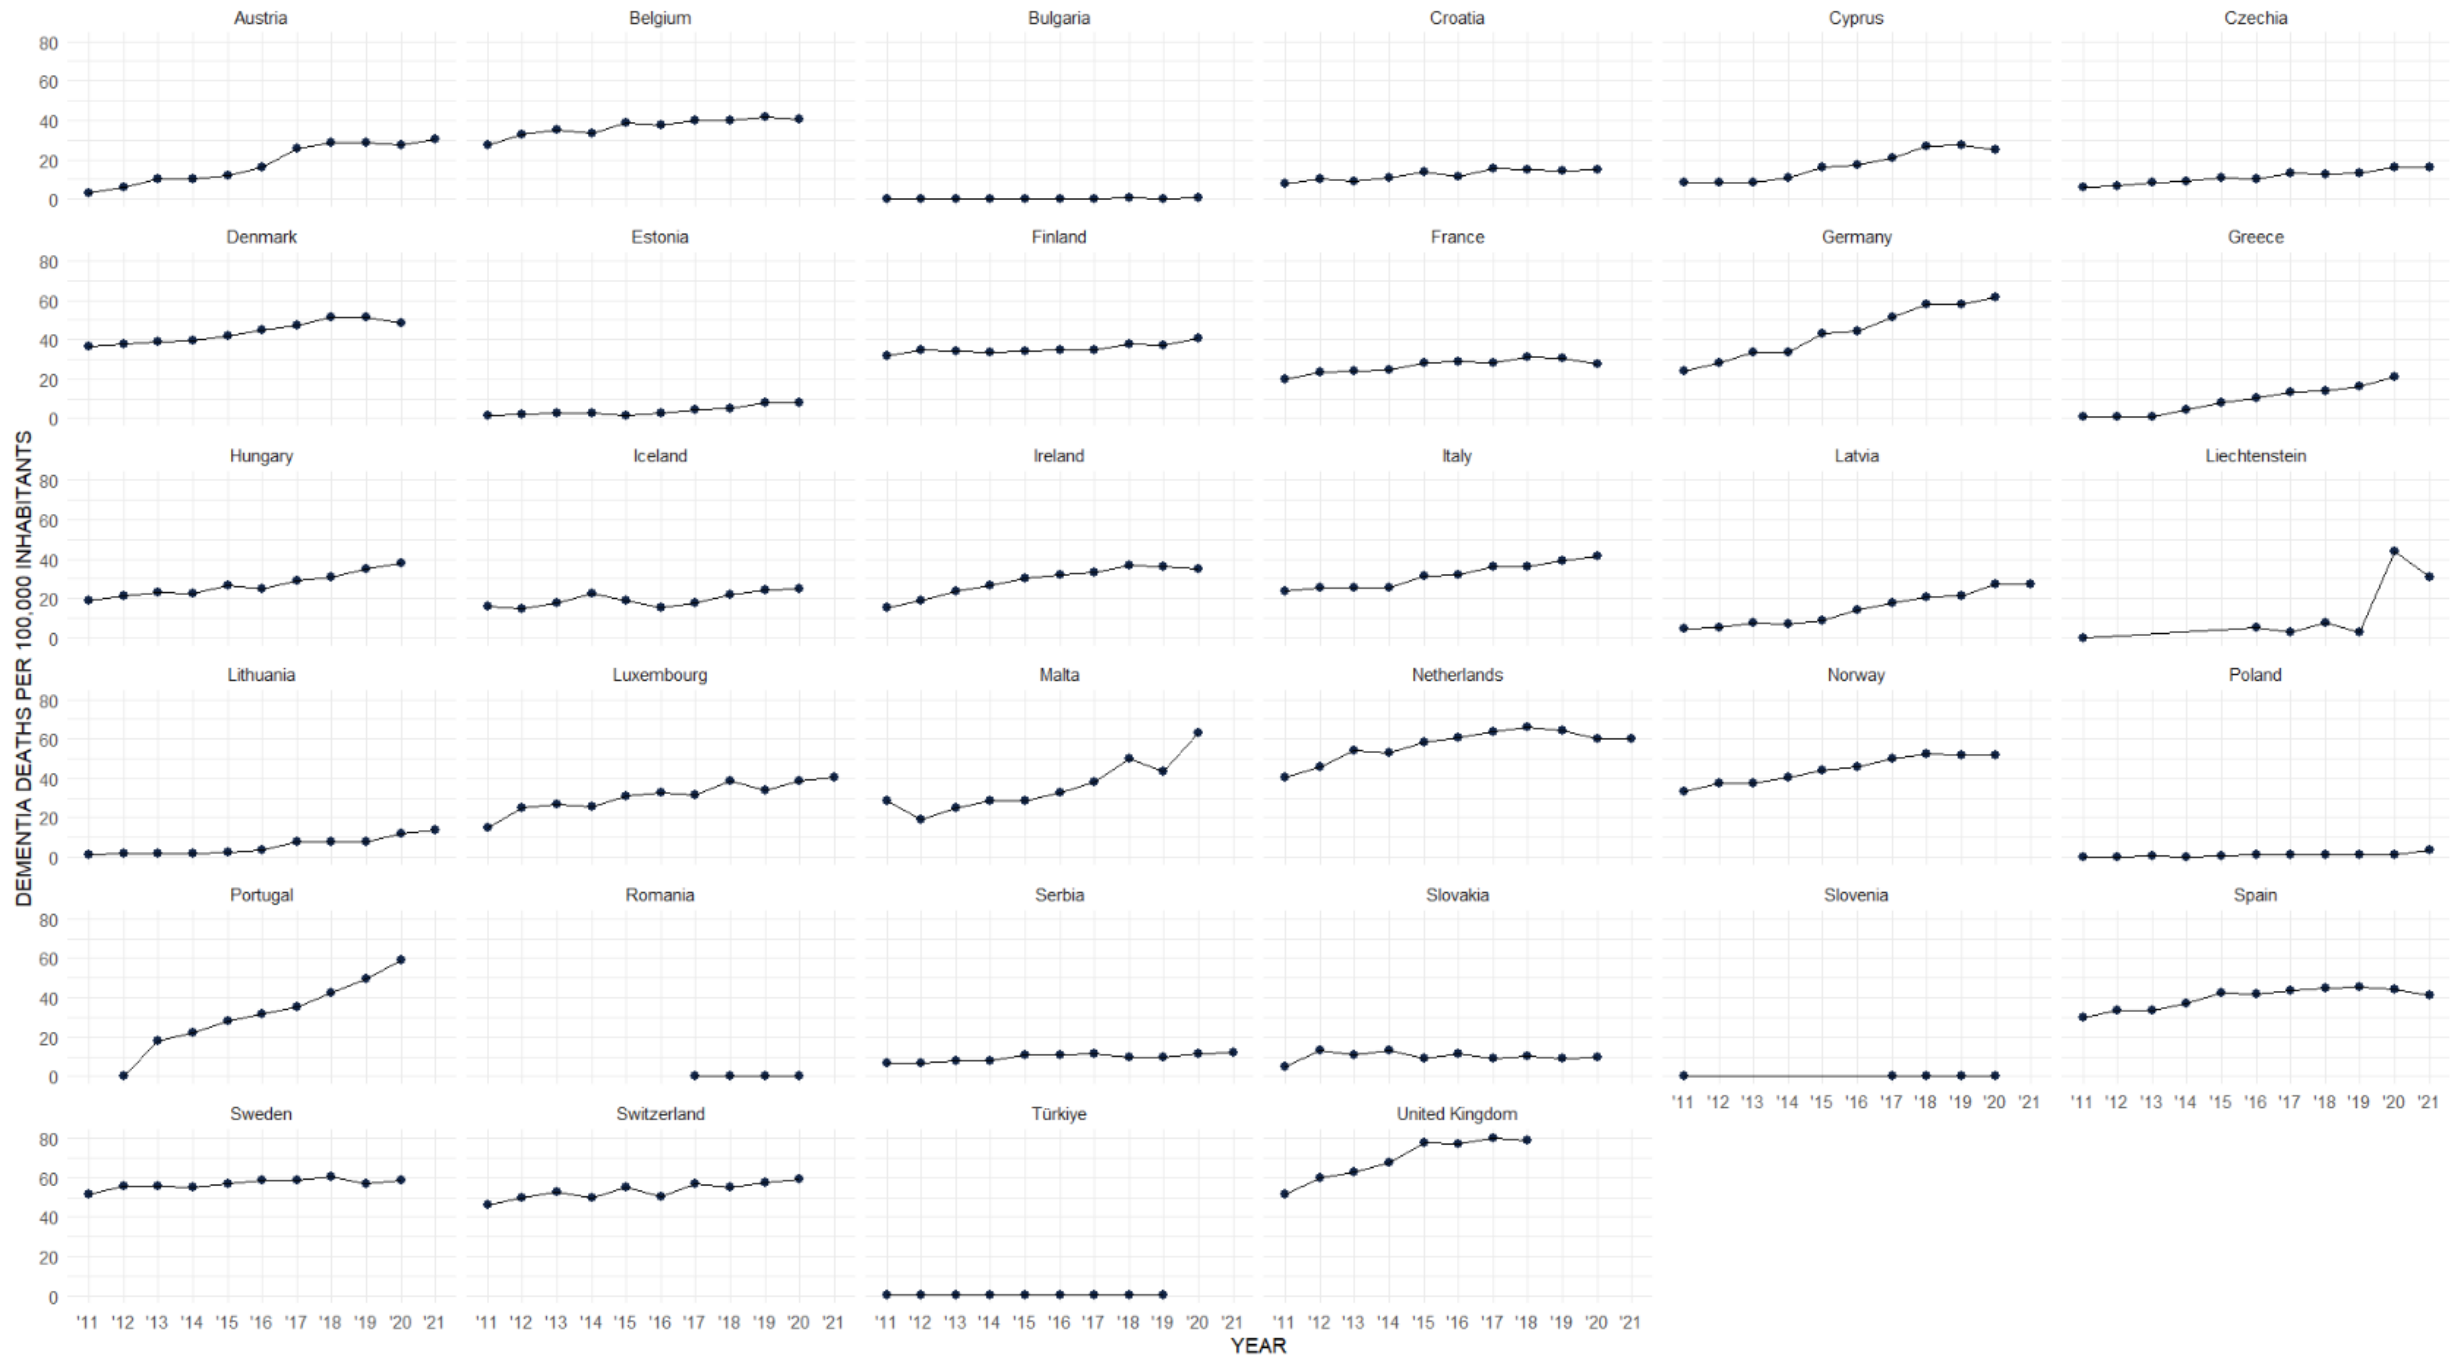

Figure 7 - In all Europe countries there exists a small or big increase of dementia deaths over the years as is happening with Greece

DEMENTIA DEATHS PER 100,000 INHABITANTS: 2011

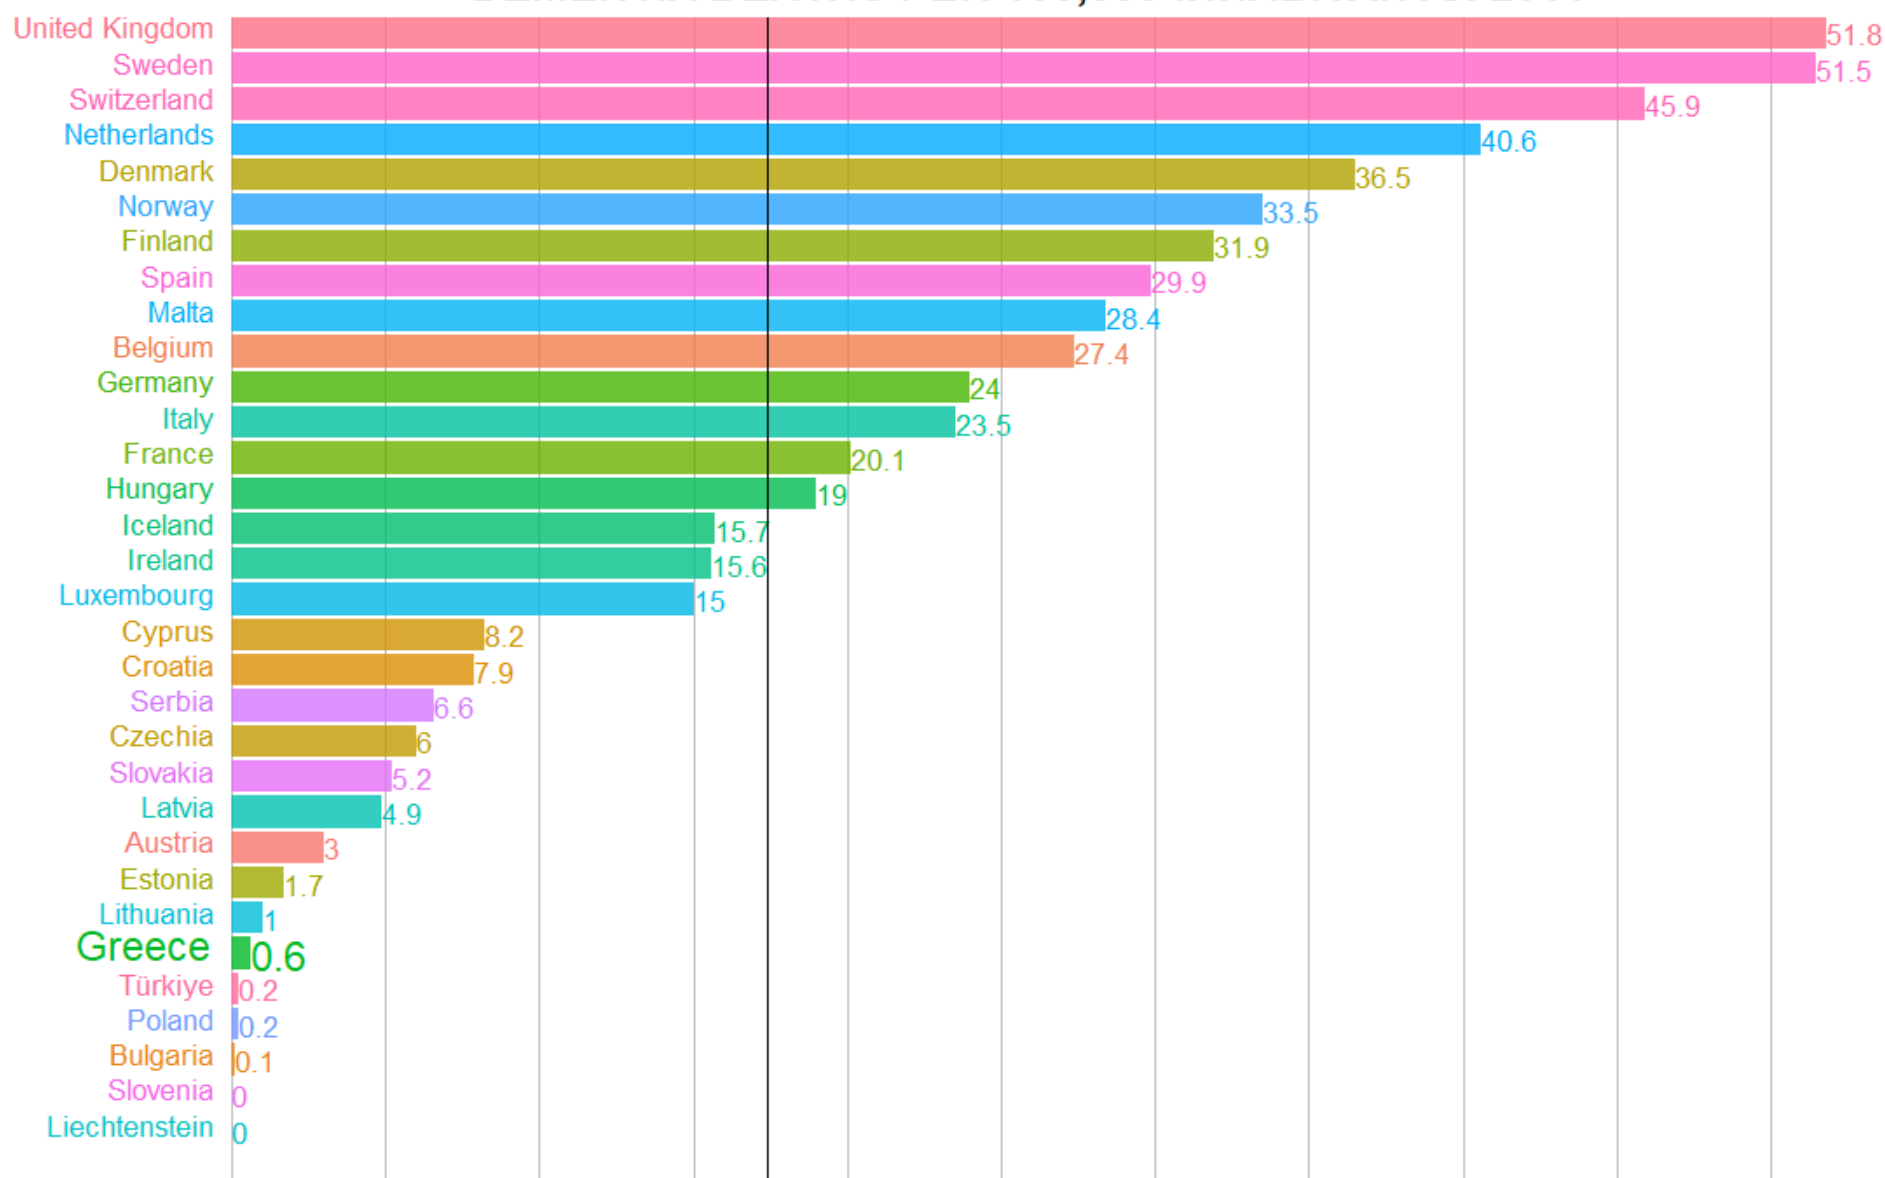

Figure 8 - Greece is always ranked below the Europe's average

DEMENTIA DEATHS PER 100,000 INHABITANTS BY COUNTRY AND GENDER

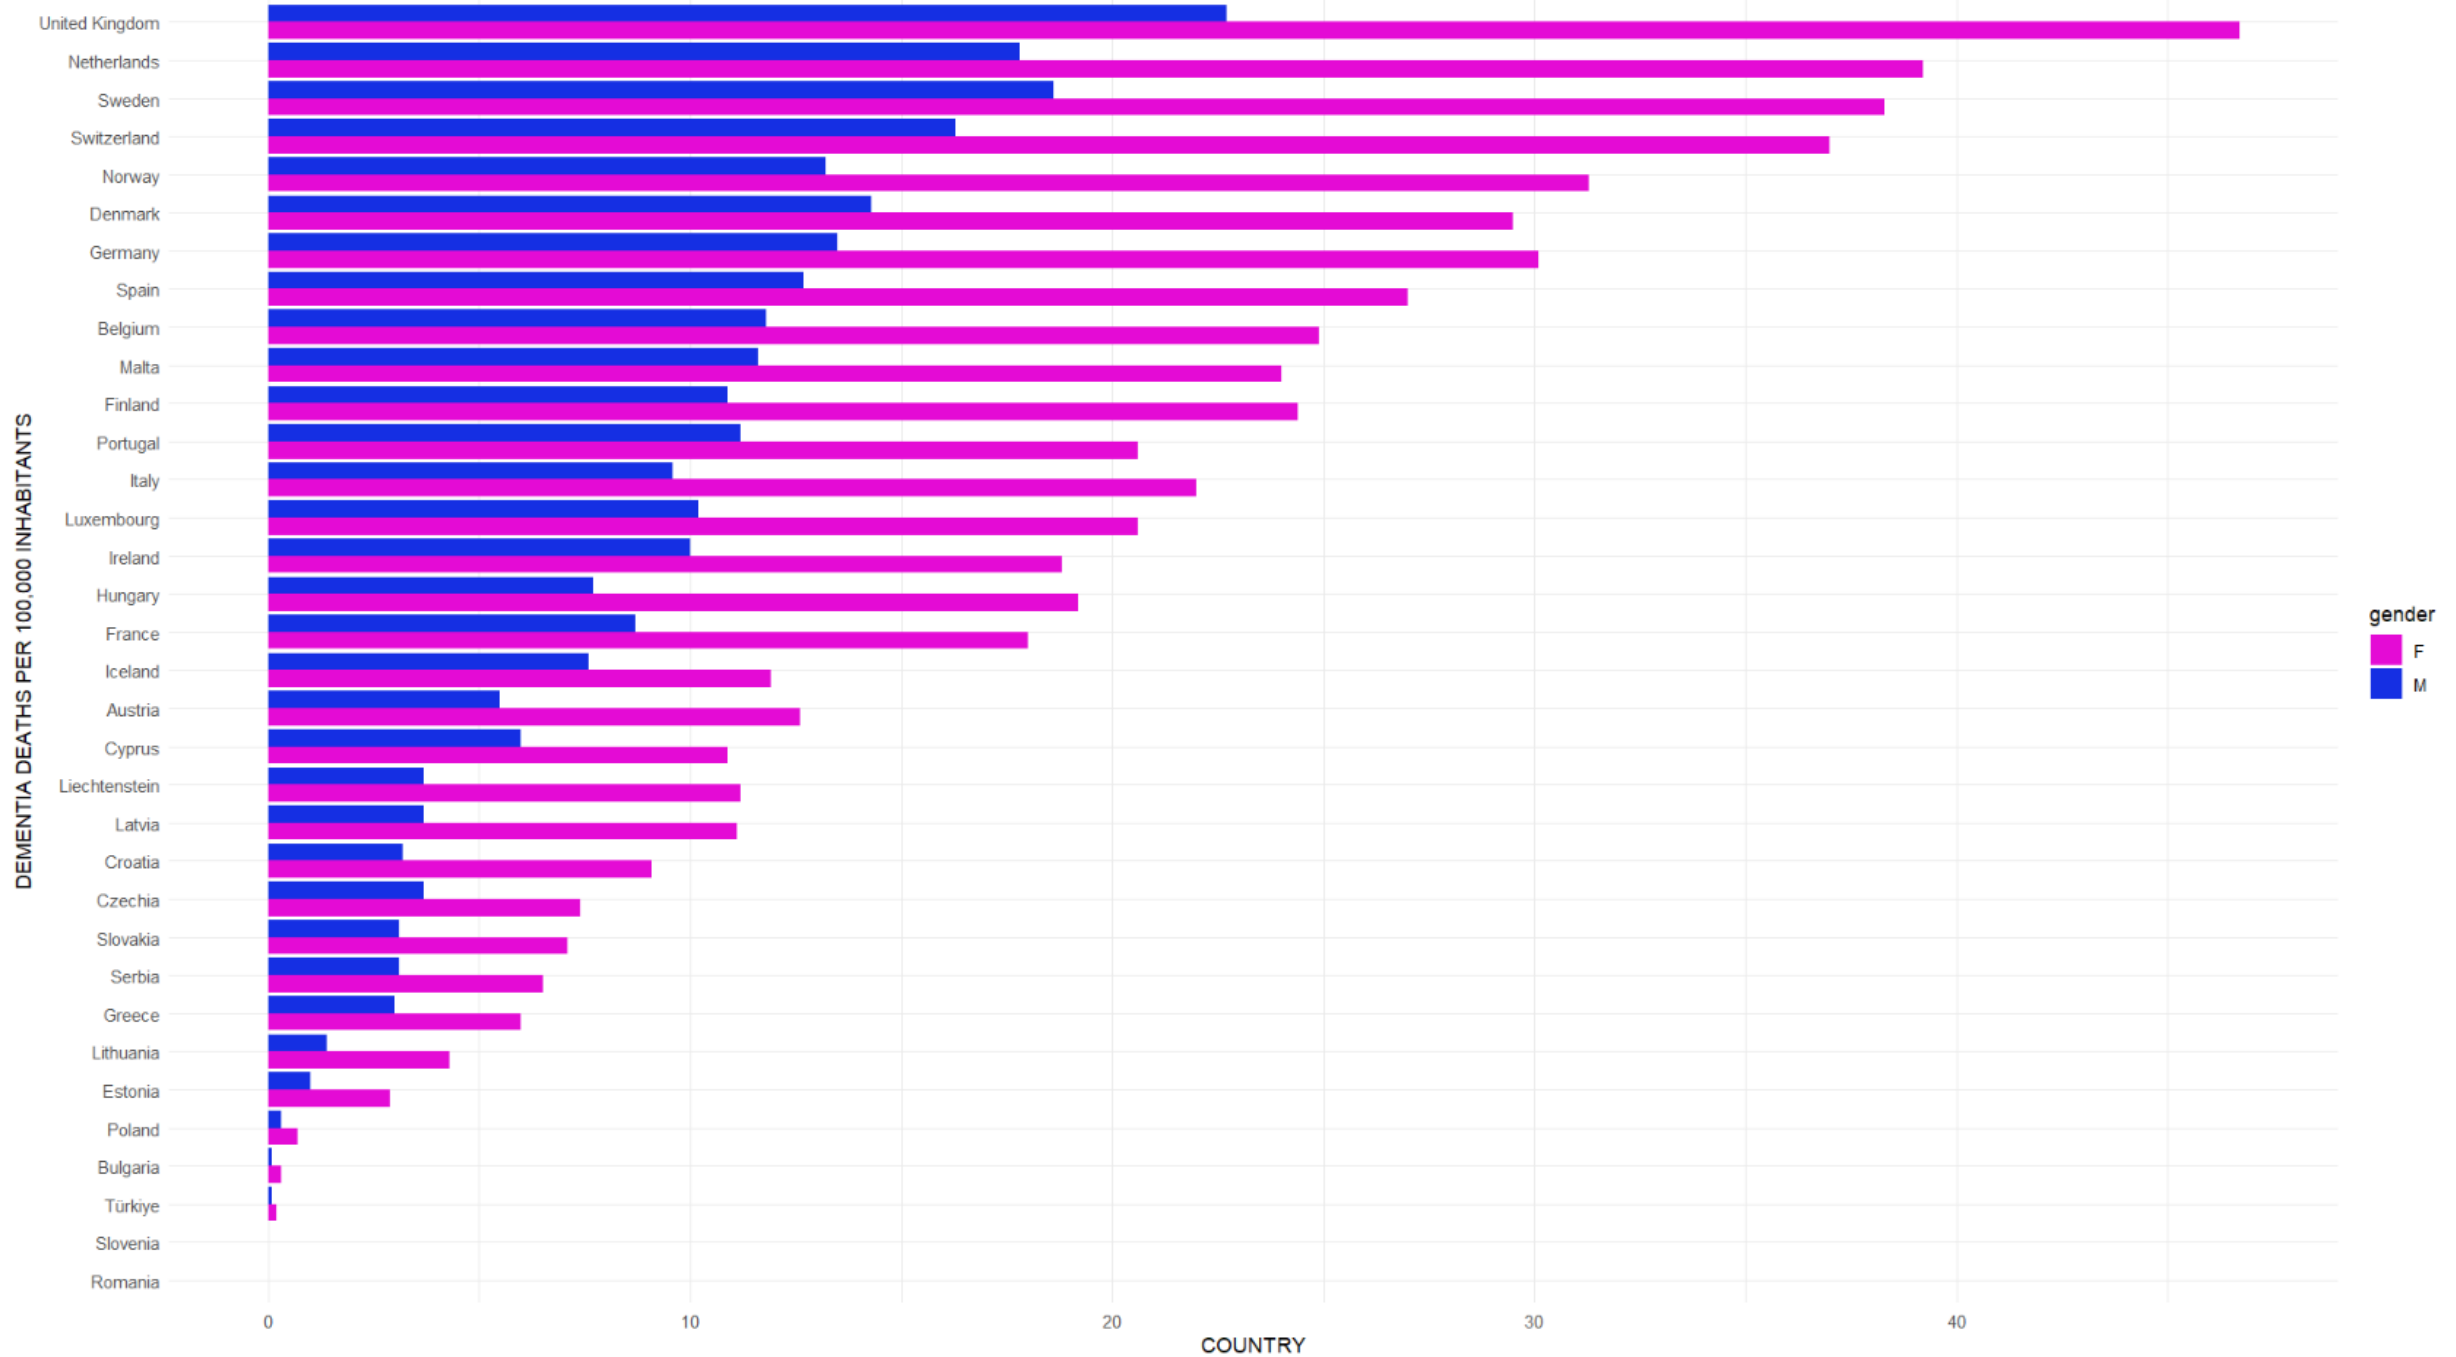

Figure 9 - In all Europe countries women have more deaths every year than men, but at least Greece has fewer death rates for both men and women than the average european country

DEMENTIA DEATHS OF GREECE BY AGE AND GENDER

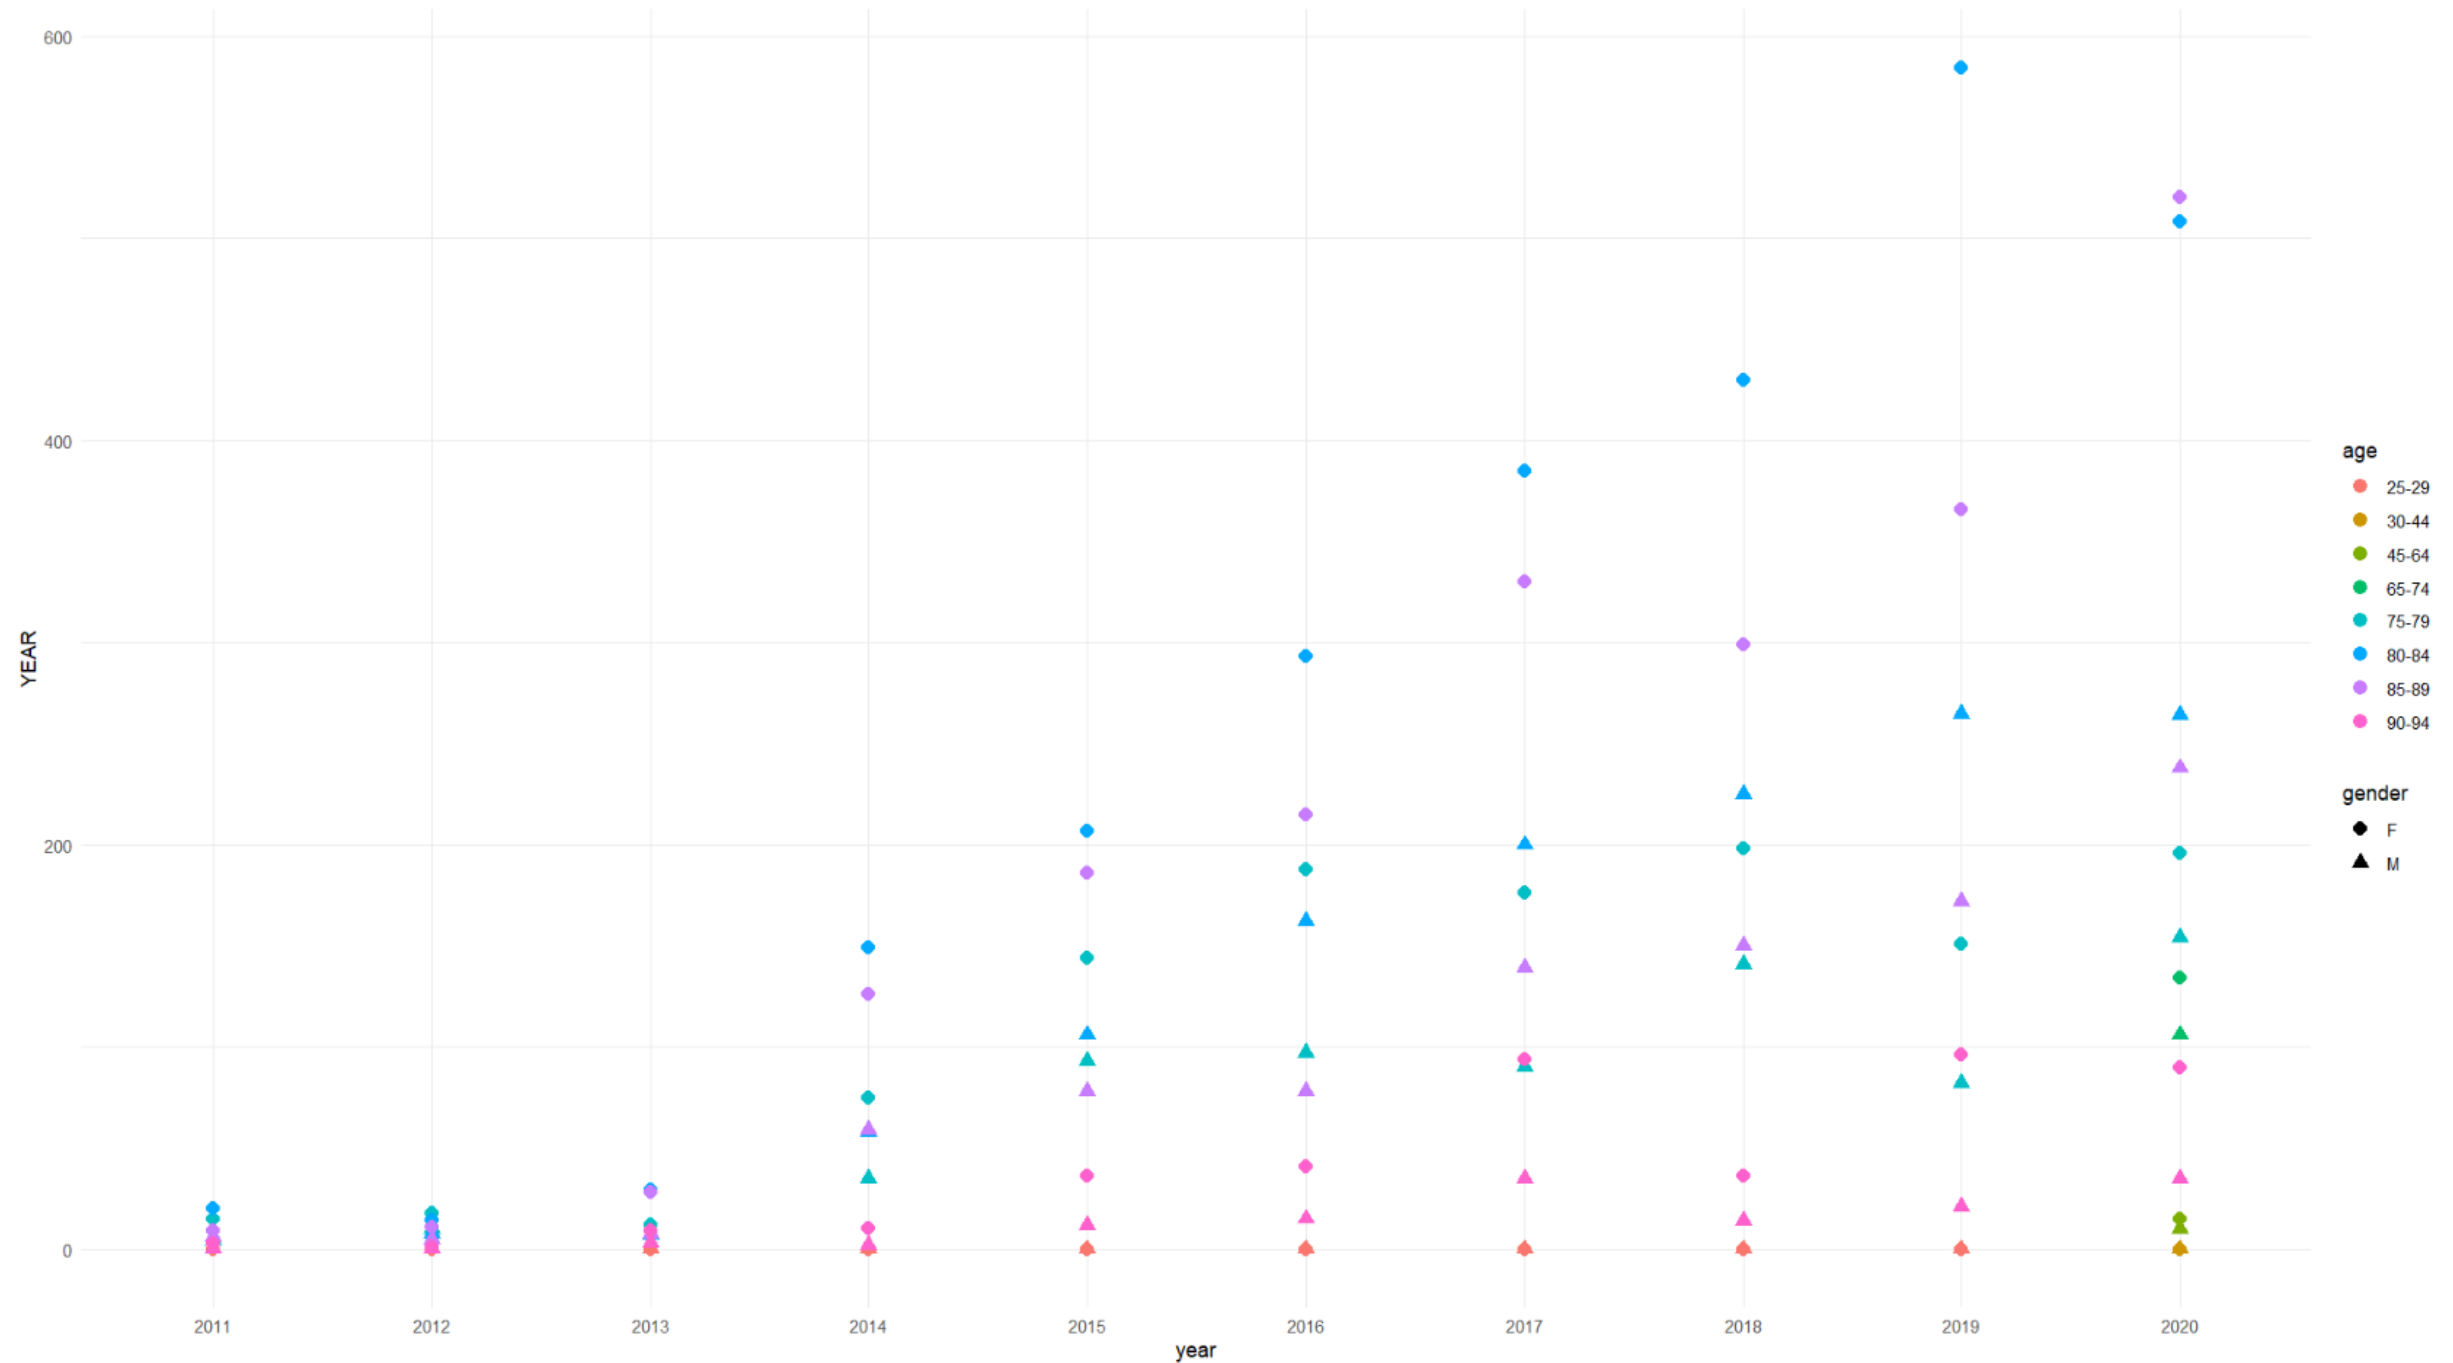

Figure 10 - In Greece the segment with most deaths from dementia each year is women who belong in the 80 - 84 age group
